

## **This course is appropriate for Parents and Carers who already have a knowledge of autism.**

To be able to open the dialogue with you child about puberty and the difficulties they may have understanding the changes it brings.

After attending this training session the delegate will be able to:

- Identify and recognise why a person with autism may have difficulty during puberty.
- Begin to view situations from the child's perspective
- Understand how social communication difficulties can lead to misunderstanding
- Recognize social difficulties and apply a number of strategies including the use of visuals.
- Use investigative techniques such as the Iceberg.
