

Dear Parents,

We are pleased to inform you that we have been able to purchase a series of books to use during Year 2 to help your child gradually prepare for the Juniors. Each child in the year group will be given a book for:

- Mathematics,**
- Reading**
- Grammar, Punctuation and Spelling.**

The children will be given small activities that take very little time to complete from each book during the course of the week. These will help you as parents/carers to see what the children are learning each week and the strategies used. It is important that your child brings their books to school every single day as we will be using them in class to help support and further learning.

We have only been able to purchase one of each book per child and unfortunately do not have any spare copies of the books to give to your child should they be lost or damaged. Therefore, if you do lose these books we would politely ask you to replace them. They can be purchased from the Rising Stars website (www.risingstars-uk.com).

Your child will still receive times tables revision and spellings to learn each week. The children will still have their reading books changed once a week.

You will find that the exercises are not too time-consuming and they will be beneficial in helping to consolidate the learning which has taken place in class. They will hopefully give you a clear idea of the type of exercises which your child will be expected to complete independently by the end of Year 2.

Many thanks for your continued support,

Mrs. Duckworth, Miss Bingham and Mrs Rice

Year 2 Team
