

Feedback from Parents of children on ASC Inclusion programmes

“Michael’s confidence has improved,
and its enhanced his interactions with
other children”

**“His social interactions are lasting
longer outside of school”**

“He has started to manage his
emotions more and is not hitting out”

**“This is the first activity he has
stuck to and looks forward to”**

“Listens to instructions better”

**“Huge improvement in confidence
and public speaking”**

“I am really pleased with the progress
he is making”

**“He seems to have more patience
and understanding of others
perspectives. Its fantastic”**

LEGO® Based Therapy Specialists

ASC INCLUSION

Do you want your child to:

- **Make new friends.**
- **Develop and practice positive social skills.**
- **Improve their confidence and self esteem.**

**ASC Inclusion uses LEGO®
to build fun models, great
social skills and amazing
friends.**

PROGRAMMES

Developed by psychologists, social workers and SEN teachers
 Our **Three Options** have been devised to meet a range of needs.
Improving Lives One Block at a Time

LEGO® BASED THERAPY:

“The best kind of therapy is when it's so much fun that the child doesn't know it's happening.

LEGO®-based therapy fits that bill.”

- **Lynn Koegel**, PhD, Clinical Director, Koegel Autism Centre, University of California, Santa Barbara, CA.

Our facilitators are highly motivated experienced professionals, who have trained with Dr Gomez de la Cuesta, one of the principal researchers into the benefits of Lego® based therapy. We have adapted and developed programmes that are being successfully delivered in schools and in the community.

ASC Inclusion is a **NOT FOR PROFIT** community organisation which aims to reach as many children as possible.

“They work wonders with those little plastic blocks”

- Jan, SENCO Wirral

INTENSIVE LEGO® BASED THERAPY:

Ideal for children with **high anxiety** who need extra support to encourage them to become more **confident**. These sessions are delivered on a one to one basis. The programme is individually tailored with the aim of progressing children onto the Lego® based therapy programme.

Focusing on Each Child

Building Great Skills

LEGO® BASED THERAPY:

This programme has been devised to encourage children who **struggle in large groups**. Sessions are kept very small and are heavily facilitated. Lego® based therapists use focused plans for each child to deliver a programme targeting specific areas of difficulty with the aim of progressing children onto the integrated group play.

Making Friends

Becoming A Master Builder

INTEGRATED GROUP PLAY (IGP):

IGP's provide a fantastic opportunity for children to develop and practice great skills. Delivered in larger groups children are guided and prompted by trained facilitators to use and **develop positive social skills**. It is important to note that though IGP uses many Lego® based therapy techniques it is NOT a Lego® based therapy programme.

Working in Teams

Solving Challenges Together
