

## Make your own memory game.

### Step 1: Fold & cut your paper

Fold the white sheet of paper four times down and four times across to score 16 square-ish shapes.

Cut along the scores to make 16 equal size game pieces.

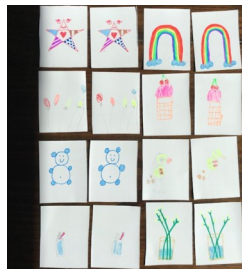

### Step 2. Decorate your game pieces

Use whatever art supplies you like (crayons, markers and/or gel pens) to create 8 fun game pieces and their matches.

### Step 3. Have fun with your designs

As long as they each have a match, the game pieces can be anything you want.

### Step 4: You are ready to play!

Turn all the pieces over and shuffle them around. Then take turns to turn two cards over at a time, if you find a match, keep your pair! The player with the **most** pairs at the end wins!
