

Bucket and ball game

Have a look around your house and see if you can find something that you could turn into a ball. You could ball up some pairs of socks, scrunch up paper, make some salt dough into a ball, use a ball of wool, scrunched up tinfoil or anything else you can think of. The only rules are that you have to create a round ball shape, you have to be able to throw it safely without hurting someone or breaking anything and it cannot be a real ball!

Next have a look around your house or garden for something that you can turn into a bucket. It could be a bin, an empty chocolate tin, a plant pot, a laundry basket or anything else you can find. The only rules are that your ball has to fit in it, it has to stand up by itself and it can't be a real bucket!

To play

- Position the bucket a distance from you.
- Create a starting line to stand behind
- Aim the ball at the bucket and see if you can throw the ball into the bucket.

Once you have perfected your shot:

- ◆ Move the bucket further away
- ◆ See if you can score 5 consecutive goals
- ◆ Play against someone. Who scores more, less?
- ◆ Keep a tally of your score
- ◆ See how far you can place the bucket from the line and still score a goal. How will you measure the distance each time? E.g tape measure, piece of string, foot steps?
