

Forks and spoons

Look around your house and see how many different forks and spoons you can find.

See if you can make a note of your findings.

Maybe you could make a tally chart
or just write down the numbers.

Tally Chart Template

Name: _____

Item	Tally IIII	Total

How could you count them?

Which do you have the most of? Forks or spoons?

Is there another way you could sort them? e.g. dessert spoons from
teaspoons? Plastic forks from metal forks?

How can you keep a record of your findings?
