

# What is your favourite animal?

Safely using the internet, can you find out five new facts that you didn't know about your favourite animal?

It might be what they like to eat, what their young are called, where they live, things they are good at, why they are well adapted for their environment.

You can record your answers in any way you like. Maybe just by chatting about it, creating a fact file, labelling a picture you have drawn, creating a poster for your bedroom, making a power point on the computer to email to your friends.

When you have found out about your favourite animal maybe you could do the same for your Mum, Dad, brother, sister, friend, Nanna or Grandad.
